

Incredibly powerful yet easy to use. Robust, secure, cost-effective and convenient water and gas meter measurement. All from the renowned research institute that operates the largest real-world testbed focused on customer energy and water use.

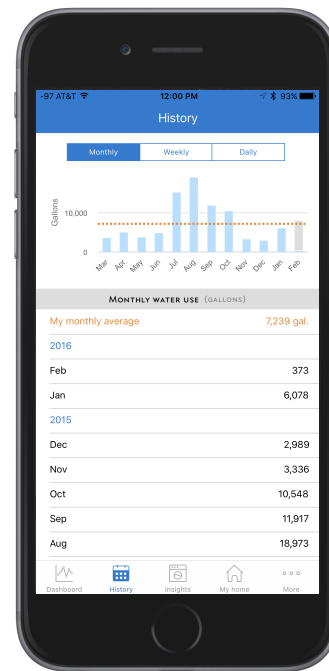

Developed through rigorous lab and real-world field testing, Blu- hardware and software products provide remote data acquisition, secure data management, real-time use information and real-time leak detection for residential and commercial customers and water and natural gas utilities.

BluWater Mobile App

The BluWater mobile app puts powerful “smart water” tech on users’ phones.

- Lets users track daily and monthly water use, review average use and compare specific water activities
- Uses past use to predict future use
- Near-realtime access to a home’s water use (requires Pecan Street’s BluCube)
- Alerts and notifications of potential leak, helping prevent large and expensive leak events
- Confidential, secure and private
- Android and iOS apps available
- White label versions available (Pecan Street brand version shown at right). Visit the Apple App Store or GooglePlay to download for free.

For technical or price information, contact info@pecanstreet.org.

Available for Android and iOS devices, the BluWater mobile app provides users near-realtime access to their water use and continuous water flow events like leaks and breaks .

BluWater works with existing smart water meter infrastructure or can be paired with Pecan Street’s BluCube and BluBand for legacy water meter infrastructure.
